About Risk
All investing involves risk, including the possible loss of the principal amount invested. There is no guarantee the funds will reach their investment objectives. Equity securities tend to go up or down in value, sometimes rapidly and unpredictably. Small- and mid-capitalization companies may be more susceptible to liquidity risk, price-volatility risk and more vulnerable to economic, market or industry changes than larger, more established companies. Each fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in a fund.
